DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitaguchi et al. (U.S. Patent No. 6,038,074).

Kitaguchi et al. discloses a three-dimensional model forming apparatus in Fig. 4; a camera is shown at reference numeral 1 in Fig. 4; an attitude sensor is shown at reference numeral 3; and a processing means is shown at reference numerals 5-8. Also, note the flow diagrams, especially the step of determining convergence as seen at step S16 in Fig. 8 and repeating steps of the program, until convergence is achieved.

Art Unit: 2851

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Sundahl (U.S. Patent No. 6,094,215).

Sundahl shows a three-dimension model forming apparatus in Fig. 1; a camera 104; an attitude sensor 128; and a processing means 140.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 3 and 4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 3 and 4 are directed to steps of a mathematical algorithm and thus drawn to a judicial exception. This rejection can be overcome by amending claims 3 and 4 to include a tangible end result or physical transformation of the calculations.
